Overview
During the Methamphetamine manufacturing process, dangerous and toxic chemical compounds become airborne and deposit onto walls, ceilings, appliances, floors and carpet, mattresses and any other household furniture exposed. The presence of these chemicals poses a health risk to occupants and a potential liability to property owners. AAHA is hosting a two (2) day training on Methamphetamine Decontamination. This training course will cover aspects of methamphetamine (meth) lab decontamination/remediation and clean up. Attendees of the course will learn the tools and skills necessary to decontaminate a building or dwelling that was used to produce meth.

Trainer
Apple Environmental Meth Removal’s Mark Shepard has over fifteen years of experience in Meth decontamination. With a background in construction and property management, he has hands on experience with decontaminating and remediating Meth contaminated properties. Mark has taught decontamination courses to over 250 different companies including; tribal housing authorities, health departments, and government agencies, they have become leading expert in Meth decontamination.

Who should attend?
Housing Maintenance Personnel and Technicians, Building Managers, Facility Managers, Property Managers, Inspection Staff, Executive Directors, Cleaners, and Construction staff.
